

TOPICS FOR TECHNICAL REPORT WRITING

1. Delta Lakehouse, its implementation and applications
2. Explore the role of automation tools in streamlining ETL/ELT processes
3. real-time data warehousing-Technologies & trends
4. Data warehousing in Big data
5. Serverless Data Warehousing
6. Data integrity, privacy and also security issues in data mining
7. Biological and visual data mining
8. Data mining at higher dimensions
9. Data warehouse design for E-COMMERCE
10. Data fusion in data warehouse
11. Ubiquitous Data Mining
12. In-memory computations for data warehouse
13. Data mining as an industry
14. The Evolution of Data Warehousing: Past, Present, and Future
15. The Role of Hardware in High-Performance Data Warehousing
16. Data lake and data warehouse convergence
17. Zero ETL
18. Green Data Warehousing
19. Automation In Data Mining
20. Data Fabric
